DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowed:

Claims 1-27 are allowed.

Regarding claim 1, the prior art record does not disclose nor fairly suggest a method of using a service in a mobile communication network, in which one or more service contents are scheduled to be provided for used use by mobile stations connected to a mobile communication system, comprising: sending a transmission request for a desired service content from mobile station; **registering the received transmission request in the transmission queue maintained in the mobile communication system; reading the service content having the transmission turn from the transmission queue when the service is transmitted; and transmitting, from the mobile communication system, the service content having the transmission turn to all mobile stations** logged into a traffic channel through which one or more mobile stations can simultaneously receive the same service content.

Regarding claim 11, the prior art record does not disclose nor fairly suggest an arrangement for using a mobile communication service, comprising a mobile communication system, which comprises base stations for transmitting services formed of one or more service contents, the arrangement further comprising one or more mobile stations connected to the base station of the mobile communication system, wherein at least one mobile station of the mobile stations connected to the base station comprises means for sending a transmission request for the desired service content, the arrangement further comprising means for maintaining the transmission queue of service contents, means for receiving the transmission request for the

desired service content, means for registering the received transmission request in the transmission queue, means for reading the service content having the transmission turn from the transmission queue when the service is transmitted, and means for transmitting the service content having the transmission turn to all mobile stations located in the service area of the base station and logged into a traffic channel through which one or more mobile stations can simultaneously receive the same service content.

Regarding claim 21, the prior art record does not disclose nor fairly suggest a network element in a mobile communication system for offering a service to mobile stations connected to the mobile communication system, wherein the network element comprises means for maintaining the transmission queue of service contents, means for receiving a transmission request for a desired service content sent by the mobile station connected to the base station, means for registering the received transmission request in the transmission queue, and means for reading the service content having the transmission turn from the transmission queue when the service is transmitted, the intention being to send said service content having the transmission turn to all mobile stations located in the service area of the base station and logged into a traffic channel through which one or more mobile stations can simultaneously receive the same service content.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
